

OVERVIEW

Copper mining operation installed custom fabricated CHROMEWELD™ 600 and QT-PLUS® replacement floors and liner kits in the Liebherr T284 Haul Trucks, replacing previous AR450 floors and liners that often required repair. Installation of JADCO products extended equipment life and greatly reduced downtime, and improving efficiency and profits.

WHO: COPPER MINING OPERATION
WHAT: T284 TRUCK BODIES
WHERE: CENTRAL AMERICA

INDUSTRY: MINING
CHALLENGE: SEVERE ABRASION & IMPACT
SOLUTION: CHROMEWELD 600 & QT-PLUS

CHALLENGE:

Extreme impact and abrasion conditions required maintenance interventions every 5,000 to 7,000 hours on the Liebherr T284's, causing significant downtime and lost production. Customer requested JADCO to design and fabricate a custom floor and liner solution to extend maintenance interventions to 18,000 hours on the T284's without significant weight increases.

SOLUTION:

JADCO custom designed and fabricated CHROMEWELD 600 and QT-PLUS floors and liners for the Liebherr T284 Haul Trucks. The JADCO floors and liners are currently above 20,000 hours without any maintenance interventions on the Liebherr T284's, currently representing 4X longer wear life versus the previous AR450 installation.

RESULTS

JADCO SOLUTION...

- 4X LONGER WEAR LIFE (AND COUNTING)
- FEWER MAINTENANCE INTERVENTIONS
- HIGHER PRODUCTION
- LOWERING OPERATING COSTS
- INCREASED PROFITABILITY

CUSTOM DESIGN AND FABRICATION

**4X
LONGER
WEAR LIFE**
